## Introduction

Thank you for purchasing the **LenoxWhirlpool** Pedicure Spa. This finest Whirlpool Pedicure Spa has been developed by J&A USA,inc. To operate dependably for many years when used properly. Please take time to read this manual thoroughly before installation and use.

## PLEASE READ AND FOLLOW INSTRUCTIONS CAREFULLY!

### Important Precautions

J&A USA requires that you contact your local, qualified electrician and plumber to install your **LenoxWhirlpool** Pedicure Spa. It cannot operate efficiently or safely unless it is provided with adequate electrical power, sufficient water pressure, proper water temperature and required drain facilities. Information on these important subject contained on this manual. We urge you to read it carefully to make sure these requirements are met.

### Precautions

1. Excessive water temperature is dangerous and should be checked before use. Maximum water temperature should Not exceed 105 degree F (41degree C.).
2. Always enter and exit the whirlpool Pedicure Spa slowly and carefully.
3. Never bring and/or operate any electrical devices into or near the Whirlpool Pedicure Spa.
4. Do not stand in the Whirlpool tub!
5. This Whirlpool Pedicure Spa has a weight capacity of 250 lbs.

## WARNING

Do not use if you are diabetic, have poor blood circulation, or if any area of your feet or legs are inflamed or have open wounds. Consult a physician before using if you have any kind of fungal infection, swelling, fracture, or persistent pain.

MASSAGE SHOULD BE PLEASANT AND COMFORTABLE.

IF YOU EXPERIENCE PAIN OR DISCOMFORT, DISCONTINUE USE IMMEDIATELY AND  
CONSULT A PHYSICIAN

This product in whole is in compliance with applicable  
UL LISTED standards and requirements for the U.S and Canada  
By Underwriters Laboratories Inc.

Some of the components of this product are  
Also in compliance with applicable  
Safety standards of following:

# **Important Considerations**

## **Electrical Service**

110V, 60Hz, 15Amp GFCI protected grounded circuit MUST be used to supply power each individual pedicure spa. And the main circuit breaker MUST be at 25Amp. For maximum of two units per each electrical outlet.

## **Water Supply**

All plumbing connections must conform to local codes.

Water supply to the spa should be provided with adequate water pressure and water temperature.

## **Water pressure**

To fill the basin correctly up to level, Normal water pressure of 30 to 80 P.S.I is required.

## **Water temperature**

The hot water supply temperature must not exceed 120°. Adjust your hot water accordingly. For hot and cold water supply fittings and drain fittings location, see below diagram .Carefully connect the water supply line to the appropriate fittings located on the rear of the pedicure spa.

## **Pressure / Temperature**

Maximum Pressure: 150 psi (10 bars)

Minimum Pressure: 10 psi (69kPa)

Working Temperature: 33F to 120F constant; intermittent to 180f  
(0.6C to 49C sustained; intermittent to 82.2C)

Maximum Recommended Flow: 15gpm (571pm)

## **Backflow Preventive Device**

All pedicure spas are pre-installed with Dual Back flow Preventive Device Dual Check Valve.

## **Dual Check Valve Specification**

Tested and certified to meet ANSI/ASSE standard 1024. CSA certified to standard No.B64.6

ANSI - American National Institute, ASME - American Society of Mechanical Engineers, CSA - Canadian Standard Association IAPMO - International Association of Plumbing and Mechanical Officials, UL - Underwriters Laboratory

## **\*\* Vacuum Breaker**

Due to the town and / or the State requirement/s are varies in building code, if the town or the State requires other than the factory pre-installed Dual Back Flow Preventive Device Dual Check Valve, the plumber must install Vacuum Breaker according to the town or the State required.

## **Drain Facilities**

The pedicure spa Drain must meet local plumbing codes. **Check valve for Drain (not Provided) Must be installed by a licensed plumber.** Also Pedicure spa must be securely fasten to the floor.

## **Installation Summary**

The installation must comply with local, state, and federal building, plumbing and electrical codes, where applicable. A licensed plumber should complete the plumbing of the pedicure spa.

Note: Failure to comply with federal, state, or local codes and ordinances will result in warranty being nullified and void.

## Installation Specifications Summary

**Warning:** Failure to comply with federal, state or local codes and ordinances will result in warranty being null and void.

As stated, the pedicure spa installation must comply with all plumbing and electrical codes. A licensed plumber and licensed electrician must complete the applicable connections of the pedicure spa.

### Location and support

Select a level location. The floor structure beneath the pedicure spa must be capable of supporting the occupied pedicure spa.

For the seat back to fully recline, the pedicure spa base must be mounted as follow from the wall as shown below:

\*\*\* When chair slide all the way back – would require 14 inches from the wall\*\*\*

**Due to continuous improvements on all our products, specification, characteristics, packing, color, designs are subject to change without notice.**

## **MAGNA-JET (OPTIONAL)**

### **Safety Instructions**

**When using electrical equipment, basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons, including the following:**

1. Read and follow all instructions before using the equipment.
2. Keep the cord out of heavy traffic area. To avoid fire hazard NEVER put the cord under the rugs, near heat generating devices.
3. Always turn off the equipment before servicing.
4. Do not drop or insert any object into any openings.
5. Do not operate any equipment with a damaged parts.
6. Any other use not recommended by the manufacturer may cause electrical shock or injury to persons.
7. Never use outdoors
8. Do not attempt to repair or adjust any electrical or mechanical functions on the unit.

Insert must be aligned with hole to pumps to run effectively

### **MAGNA-JET Features**

1. Dual powerful massage jet-streams
2. Jet assembly can be attached from the pump for quick cleaning and sanitizing.
3. Built-in electronic sensor for pump control.
4. Automatic shutdown when the jet assembly is removed from the pump.
5. Automatic shut down if water level in the basin is low.
6. AC motor (long life)
7. Extremely low power consumption (27W).
8. Manufactured in USA.

### **Cleaning Instruction**

1. Ensure the unit is off
2. Remove the front cover
3. Remove the impeller and impeller cover
4. Use anti-bacterial solution (EPA registered) to clean all plastic parts.
5. Reassemble the front cover

### **MAGNA-JET Specifications**

Model: MAGNA-JET - 120VAC, 60Hz, 1.0Amp, 27W

Pump: Dual Jet Flow

Mounting: Single 3.5" hole  
Auto tighten Mounting screws(4)

# Discharge Pump LENOX

## Installation Instruction

1. Make a hole ( size 1-3/8") for the On/Off switch as shown (see fig 1). Pre-drill required.
2. Place a 1/8" clear hose into the rear of the switch and on/off switch into the hole.
3. The discharge pump kit is made to fit onto the pedicure unit. (see fig 2)
4. Connect E-Z connector onto the drain elbow.
5. Plug discharge pump outlet into the two minute timer outlet

2. Remove backrest by lift up
3. Follow below figures

Unlock the hook by pressing latch from recliner piston to pull out insert

The Pivot of back insert is removable

Recliner piston to latch

## **DISINFECTING YOUR PEDICURE SPA**

**Note:** Please be advised that it is responsibility of purchaser/user to adhere strictly to the following procedure.  
Any non-compliance will be considered negligence of the purchaser/user.

The Bureau of barbering and cosmetology requires that salons using whirlpool pedicure spas use the following disinfecting Procedures to ensure proper cleaning and maintenance of the equipment, and to prevent bacterial infection.

### **After each customer:**

1. Drain all water and remove all debris from the pedicure spa.
2. Clean the surfaces and walls of the basin with soap or detergent and rinse with clean, clear water.
3. Disinfect with an EPA - registered disinfectant with bactericidal, fungicidal, and virucidal activity.
4. Wipe dry with clean towel.

### **At the end of the day:**

1. Remove the intake suction screen, All debris trapped behind the screen of each pedicure spa must be removed.  
And the screen and the inlet shall be washed with soap or detergent and water
2. Before replacing the screen, Totally immersed the screen into an EPA- registered disinfectant with bactericidal, Fungicidal, and virucidal activity.
3. Finally, flsh the whirlpool system with low-sudsing detergent and warm OR an EPA - registered cleanser for 10 minutes. Rinse with clean flash water and drain.

### **Every other week**

1. After following the outlined required cleaning procedures for the end of each day, fill the basin with warm water  
And 1 teaspoon of 5.25% powdered bleach for each one gallon of water.
2. Circulate the solution through the whirlpool system for 5 to 10 minutes.
3. The solution rests for over night (at least 6-10 hours)
4. The following morning ( before the first customer) drain and flush the system with water.

## Troubleshooting Guide

If there is still a problem after trying the solutions given in the troubleshooting guide, stop using the product immediately so as to prevent accident or injury and unplug the product from the wall outlet. For technical service, please contact J&A technical support at 631-243-5300 with any issue that cannot be resolved using troubleshooting guide.

No water movement  On/Off button - No click sound On/Off button - Click sound	1-Verify unit is plugged in to live wall outlet. 2- Press reset button on the wall outlet. 3- Verify air activated tube is plugged in to black control box. 4- Ensure that the magnetic jet assembly is properly and securely attached to the basin.
Water not Draining  Not Draining properly  Not Draining properly with PDP (Power Discharge Pump)	1- Be sure Drain plug is set high enough to allow water to pass through (Gravity Drain) 2- Check for plugged drain and clear if clog is found. 3- If pump is heard, Check for plugged drain and clear if clog is found. 4- If pump is heard , Check for air lock ( see PDP in manual) follow instruction. 5- If pump is not heard, verify discharge pump is properly connected to two minute timer And to black control box. 6- If pump is not heard, verify two minute timer
Water Pressure is low and/ or not coming out.  The water sprayer is not working or very little water comes out of the sprayer.	1- Verify if water utility valve is on. 2- Check for loose water connections under the basin and at the rear of the basin 3- Check if sprayer screen is clear. 4- Verify if water supply braided hoses are snug and not twisted on the faucet.
Losing water  The basin continually loses water either quickly or slowly	1- Check drain plug for tears in rubber gasket 2- Check drain plug height is correct and bolt below plug is tight. 3- Verify drain strainer is tight. 4- Verify if water level is correct.
<b>Massage Chair</b>  Noise during operation  During tapping and kneading.  Sound of roller squeaky rubbing against cover.  Clatter during normal operation.  Vibrating mechanism noise.  Sound of recline or slide mechanism.	These noises are a normal part of the product's operation and do not effect its performance in any way.
Remote control do not work properly.  Remote control working with out power light.  Remote control with power light and not working properly	1- Verify connection if fully plugged in. 2- If chair is not return to normal, stop using the chair and unplug it from the wall outlet. Contact the vendor or J&A service for assistance.

Massage stops in the middle of the program	<p>Reset the main power switch located at the rear of the chair to OFF and back ON after about 5 second.</p> <p>1- if the chair return to normal, No further action is required.</p> <p>2- if the chair does not return to normal, stop using the chair and unplug it from the wall outlet. Contact the vendor or J&amp;A service for assistance.</p>
--	---

The roller stop during the massage	<p>Sometimes when the speed is slow than a normal and there is too much pressure to the rollers, it may stop moving temporarily. This is not breakage. Just release pressure by lift body weight.</p>
------------------------------------	---

The roller moved up or down and then stop.	<p>Auto timer will cause the rollers to move up to the top of the chair and sometimes roller pass secondary stopper and causes mis-alignment of the roller.</p> <p>1- contact vendor or J&amp;A service for assistance.</p>
--	---

The right and left rollers are out of alignment.	<p>The rollers are designed to provide for alternating tapping function, So in the stopped position it seems they are out of sync. This is part of the design, and there is nothing wrong with product.</p>
--	---

Reclining and sliding cannot be perform	<p>Check to be sure there are no objects between the seat back, where moving mechanism . This unit has maximum weight capacity of 225 lbs.</p>
---	--
